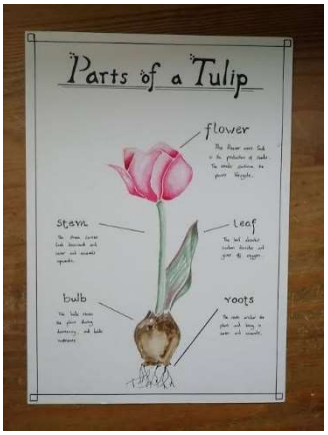
Friday 6th November 2026

Dear Parents/Carers,

In Science this term, learning will focus around bulbs, including their function and what conditions are best for their growth. In Geography, children will explore local areas, including wider Northamptonshire.

To extend your learning at home children could…



1. Plant a bulb – grab yourself a pot and some soil and plant a flower that grows from a bulb. Choose a plant that grows best in the winter, such as snow drops or crocus. Take some photos as your plant grows to share with the class.

2. Create plant poster – draw and label the key parts (bulb, roots, stem, leaves and petals) of a plant that grows from a bulb.

3. Make a map – create a map of somewhere you have been in Northamptonshire (maybe a park, farm, lake). Challenge: Add map symbols (e.g. toilets, camp site, parking)

4. Features walk – take a walk around your local area. Choose human or physical features to make a note of or draw onto a poster.

Completed projects should be brought into school by **Friday 11th December**.

Many thanks for your continued support,

A. Thomas
