Autumn 2 Overview:

Class Daily Read: Street Child 

Big Events: Y4 Residential, Christmas Pantomime

English

In English, pupils will use *Oliver Twist* to write a narrative opening and ending using a cliffhanger. They will develop fronted adverbials and relative clauses before explaining how a Victorian workhouse operated.

Maths

In Maths, pupils will develop their use of all four operations and apply these to everyday problems. They will also learn to measure and calculate the length, perimeter and area of shapes.

History

In History, pupils will continue exploring crime and punishment through time, focusing on witch trials in the local area. They will examine beliefs, accusations and trials and compare historical justice with modern approaches.

Science

In Science, pupils will explore how light travels and enables us to see. They will investigate reflection, shadows and how their size changes and learn how light behaves when it meets different materials.

Geography

This subject will be taught again next term.

PHSE

In PSHE, pupils will celebrate the differences between people. They will explore what makes everyone unique, understand why diversity is important and learn how to show respect, kindness and acceptance towards others.

Art

In Art, we will be studying architecture. Pupils will investigate buildings through drawings and learning about the work of architect Zara Hadid and researching artist 'Hundertwasser'.

RE

In RE, pupils will explore the Christian belief of Pentecost and what happened after Jesus left. They will learn how the Holy Spirit influenced the disciples and the growth of the Church.

Music

In Music, pupils will explore classroom jazz through listening, performing and improvising. They will develop their understanding of rhythm, pulse and musical structure while learning to play and perform jazz pieces confidently.

PE

In PE, pupils will develop their skills in dodgeball and hockey. They will practise throwing, catching, striking and teamwork while considering how regular activity and skill development can improve their fitness and performance.

Computing

In Computing, pupils will design and create interactive quizzes using 2Quiz. They will explore different question types, add creative features and develop their debugging skills by testing, refining and sharing their quizzes.

French

In French, pupils will learn vocabulary for school. They will describe subjects they enjoy and name school resources. They will learn to speak in sentences, respond to questions and practise pronunciation through oral rehearsal.
