Dear Parents/Carers,

As part of our ongoing maths learning, pupils in Year 6 are focusing on important key instant recall facts (KIRFs) this term. These are essential for building speed, confidence and fluency in calculations.

**Year 6 KIRF: Know all previous number bonds including decimals**

To support your child at home, you could try some of the following activities:

For knowing number bonds including decimals:

- Practice adding numbers seen out and about – what do I need to add to make ....?
- Play matching games with numbers written on pieces of paper.
- Go shopping and work out what change is needed from the amount they have paid.
- Discuss their work with them and get them to talk through what they are doing.

Regular practise at home will help your child gain confidence and fluency, which in turn supports more complex calculations in school.

Thank you for your continued support in helping your child develop these essential skills.

Kind regards,

*J. Grunill*
